Stuart Crump

Picture Editing, Printing & Publishing

Tutorial 2 of 2

Overview

- 2 Sessions (3rd May & 18th May)
- Last Session
 - All about “Input” and “Manipulation”
 - Image formats, types and sizes, what’s best.
 - Tools, what to look for.
 - Manipulation, changing images for the better!
- Tonight
 - All about “Output” and “Sharing”
 - Printing, what options do I have.
 - Sharing, different media for different occasions.

Image formats to print

- Depends on what you are printing, and printing to.
- Printing at home
 - Easy, you print from your native application
 - eg. Print from PhotoShop directly to your printer
 - Use any format the software supports
- Using a printing service
 - Available online and in shops (Jessops, Tesco, etc...)
 - File formats can be limited (best use JPG)
 - Can print large sizes (A5 – A0)
 - Let them take the strain
 - Can be good value but check the paper quality first
- Scanned Images
 - Files can be big
 - Possibly scanned in at a high resolution and dots per inch (dpi)
 - May need manipulating before sending to print (home or service)
- Web Pages / Images
 - Aimed at quick downloads so quality only suffice for the screen
 - Not suitable for a printing service
- Photographs
 - Print at the highest quality you can
 - Probably JPG or RAW format.

Printers

- Lots of different types
 - Colour
 - InkJet (and similar) : £40 - 250
 - Laser: £125, although some cheap ones
 - Dye Sublimation : Too much
 - Duplex?
- Check the cost of the ink
 - Printers can be very cheap but 2 cartridges might cost you the same price as the printer!
- Don't be enticed by gimmicks you'll never use although might be suitable for some...
 - eg. Tiny LCD screens, links to cameras you don't have and outdated/limited adoption of technology.

Sharing

- 3 options, easy first...
- Print
 - Print all your photos on paper
 - PROS: Nice to have something tangible, easy to show and give (postcards?)
 - CONS: Subject to ageing, damage, availability, ink/printer/paper cost
- Online
 - Use the web as a photo album
 - PROS: Can be free or less than £20 a year, safe, availability, slideshows...
 - CONS: Lots of options (unfortunately), security
- CD/DVD
 - Burn your photos to CD or DVD, simple or slideshow
 - PROS: Availability, size (3000 on one DVD!), customisation
 - CONS: Subject to damage, time consuming, requires practice, software cost, media cost

Print

- Do I need to say anything?
- Bonus Print (*9p per print)
 - <http://www.bonusprint.co.uk/>
- PhotoBox (*10p per print and 10 free when you sign up)
 - <http://www.photobox.co.uk/>
- Jessops PhotoExpress (*20p per print)
 - <http://www.jessopsphotoexpress.com/>

Online

The screenshot displays the Yahoo! Photos website interface. On the left, a 'Browse' section shows a grid of 460 photos from Dec 16, 2003, to Aug 17, 2004, with a calendar view below. On the right, a 'Your sets' section shows a set named 'Fireworks' containing 5 photos. Below these are three numbered steps: 1. Find the Photos You Want to Share; 2. Upload Photos to Your Album; 3. Share Photos with Friends and Family. At the bottom, the 'Yahoo! Easy Upload Tool' is shown, featuring a table of files being uploaded and a progress indicator.

Image Name	File Size

CD/DVD

- Can really
 - Music
 - Menus
 - Descriptions
 - ...
- Easy to share
 - Play on TV
- Lots of software
 - Cross-compatibility
- Best results
 - but they are expensive
 - To make a good one
 - Keep it up to date
